# SCALE FOR PROJECT LEONARDO JAVA DAY-05 (/PROJECTS/LEONARDO-JAVA-DAY-05)

You should evaluate 1 student in this team

Git repository

git@vogsphere.42roma.it:vogsphere/intra-uuid-9586d65c-afb8-

## Introduction

The methodology of School 21 makes sense only if  
peer-to-peer assessments are done seriously.  
This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all communications during this assessment. The bond of trust between community 21 and you depends on it.
- Highlight possible malfunctions of the work done by the person and take the time to discuss and debate it.
- Keep in mind that sometimes there can be differences in interpretation of the tasks and the scope of features. Please, stay open-minded to the vision of the other.

## Guidelines

- Evaluate only the files that are on the GIT repository of the student or group.
- Doublecheck that the GIT repository is the one corresponding to the student or the group as long as to the project.
- Meticulously check that nothing malicious has been used to mislead you and have you assess something except the content of the official repository.

- If you have not finished the project yet, it is compulsory to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty or non-functional solution as long as a case of cheating.

In these cases, the assessment is completed

and the final grade is 0 (or in a case of cheating is -42).

However, except for a case of cheating, you are encouraged to continue reviewing the project to identify the problems that caused the situation in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise even if the following exercises are correct.

 subject.pdf (<https://cdn.intra.42.fr/pdf/pdf/91905/en.subject.pdf>)

## Preliminaries

---

### Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work at any time during the assessment.
- The general rules and any rules specific to the day are respected throughout the assessment.

 Yes

 No

---

## Piscine Java | MODULE 05

---

### Exercise 00 – Tables & Entities

- Does project structure comply with the task?
- Does the structure of models comply with the task?
- Are implementations of equals, hashCode, and toString methods provided for?
- Are there at least five test data sets for each table?
- Are relational links used?
- Are entity identifiers generated by DBMS itself?

 Yes

 No

---

### Exercise 01 – Read/Find

- Are interface and its implementation both available?
- Does repository use HikariCP as an input parameter?
- Is HikariCP dependency specified in pom.xml?
- Is correct operation of the implemented method demonstrated in Program.java?

☒ Yes

☐ No

### Exercise 02 – Create/Save

- Is NotSavedSubEntityException exception thrown when sub-entity identifiers are specified incorrectly?
- Will an entity have a DBMS-generated identifier specified after saving?
- Is correct operation of the implemented method demonstrated in Program.java?

☒ Yes

☐ No

### Exercise 03 – Update

- Is correct operation of the implemented method demonstrated in Program.java?
- Will external key be updated in DB if a message author is changed?
- Will NotSavedSubEntityException be thrown if an author with a non-existent ID is specified in the message?

☒ Yes

☐ No

### Exercise 04 – Find All

- Are interface and its implementation both available?
- Does pagination mechanism return a correct amount of results of the required page for test data?
- Is a single query used in DBMS at most?
- Are sub-entities filled correctly?
- Is correct operation of the implemented method demonstrated in Program.java?

☒ Yes

☐ No

## Ratings

Don't forget to check the flag corresponding to the defense

☒ Ok

☐ ★ Outstanding project

☐ Empty work

☐ No author file

☐ Invalid compilation

☐ Norme

☐ Cheat

☐ Crash

☐ Leaks

☐ Forbidden function
